In the Google Doc, include images of each screen of your wireframes. The images must be digitally created (using a tool like Miro or Keynote), not drawn by hand. You should have at least 3 images.

In 3-5 sentences, please share an overview of your and/or your team's process of creating wireframes or a prototype. What was the most challenging thing about the process of creating your wireframes or prototype? What did you learn?

- One of the biggest challenges we faced was ensuring consistency across different screen pages and also balancing simplicity with functionality was a bit challenging too.

Through this experience, I learned the importance of establishing a style guide or design system to maintain uniformity through the wireframes.

Create a link to the slides that you and your team created for the Team Activity: Create Your Pitch Slide Deck, and share it in the doc. Make sure that the link is viewable for all. Just a reminder that your slides must contain the following elements as described in the activity:

Please briefly describe your role in helping create the slide deck.

My role primarily involved selecting and customising templates. After exploring numerous options, our group collectively decided on the most suitable template. From there, I took the lead in integrating our content seamlessly into the chosen template, ensuring a cohesive and visually appealing presentation.

A. What is working well with your team?

Our team excels in effective communication and proactive collaboration.
